

Dear Michigan Voter,

We pray for your strength in the Lord and call on you to add your voice in the pursuit of justice and election integrity. As you may be aware, a recent rural Antrim County case argued “material fraud or error” had taken place in the 2020 election, so a forensic audit was needed to determine the truth. Sadly, a Michigan judge dismissed the case, saying our legislature had given the responsibility for an audit to the Secretary of State. But as attorney Matthew DePerno said, “Apparently the SOS can conduct the audit in any way she determines even if she is actively part of the fraud.” The fox must not be allowed to guard the henhouse. Residents of this great state must take action to stop this injustice.

In signing this informal petition, you will encourage our legislators to do their duties and order a full, forensic audit of Antrim and Wayne counties. You will be telling our representatives and senators that you are with them, that they are not alone, and that you demand immediate action to restore integrity to our elections.

This petition is not asking to redo the election or change the election results. It is demanding our leaders establish confidence that the 2020 election was conducted fairly. Until Michigan residents are assured of the results of our elections, the fabric of our republic is at stake.

A whopping 70% of Detroit’s absentee voting precincts at the TCF Center were out of balance due to unexplained and suspicious discrepancies.<sup>1</sup> As a result, the SOS could not include them in her audit. How absurd is that? This is not election integrity, nor does it instill confidence in the election process.

Show your support for a comprehensive forensic audit of Antrim County and Wayne County primarily, and other counties as necessary.

Thank you for your time in completing this paper petition and for your continued prayers for our republic.

Sincerely,

Patrice Johnson, Chair,  
Pure Integrity for Michigan  
Elections

Matt Braynard, Executive  
Director,  
Look Ahead America
